

# SAFETY DATA SHEET

(REACH regulation (EC) n° 1907/2006 - n° 2015/830)

## SECTION 1 : IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

### 1.1. Product identifier

Product name : ELISPRAY A Product code : A718.

# 1.2. Relevant identified uses of the substance or mixture and uses advised against

HYGIENE AND DISINFECTION

Disinfection without necessary rinsing for surfaces in contact or not with foodstuffs.

Main use category :

**Dr**oduct intended for s

Additional Information :

Product intended for strictly professional use.

The product should not be used for applications other than those described in this safety data sheet or in the technical documents for the product.

### 1.3. Details of the supplier of the safety data sheet

Registered company name : HYDRACHIM.

Address : Z.A. Route de Saint Poix.35370.LE PERTRE.FRANCE.

Telephone : +33 (0)2.99.96.80.08. Fax : +33 (0)2.99.96.82.00.

reglementation@hydrachim.fr

www.hydrachim.fr

FABRICANT

### 1.4. Emergency telephone number : +33 (0)1 45 42 59 59.

Association/Organisation : INRS / ORFILA http://www.centres-antipoison.net.

# SECTION 2 : HAZARDS IDENTIFICATION

### 2.1. Classification of the substance or mixture

### In compliance with EC regulation No. 1272/2008 and its amendments.

Flammable liquid, Category 2 (Flam. Liq. 2, H225).

Eye irritation, Category 2 (Eye Irrit. 2, H319).

This mixture does not present an environmental hazard. No known or foreseeable environmental damage under standard conditions of use.

#### 2.2. Label elements

Biocidal mixture (see section 15).

### In compliance with EC regulation No. 1272/2008 and its amendments.

Hazard pictograms :

GHS02 GHS07	
Signal Word :	
DANGER	
Hazard statements :	
H225	Highly flammable liquid and vapour.
H319	Causes serious eye irritation.
Precautionary statements - Prevention	:
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P260	Do not breathe gas
Precautionary statements - Response :	
P305 + P351 + P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
Precautionary statements - Storage :	
P403 + P235	Store in a well-ventilated place. Keep cool.

Precautionary statements - Disposal :

P501

Dispose of contents and container to approved waste disposal plant in accordance with national regulations.

### 2.3. Other hazards

The mixture does not contain substances classified as 'Substances of Very High Concern' (SVHC) >= 0.1% published by the European CHemicals Agency (ECHA) under article 57 of REACH: http://echa.europa.eu/fr/candidate-list-table

The mixture fulfils neither the PBT nor the vPvB criteria for mixtures in accordance with annexe XIII of the REACH regulations EC 1907/2006.

# SECTION 3 : COMPOSITION/INFORMATION ON INGREDIENTS

# 3.2. Mixtures

#### **Composition :**

Identification	(EC) 1272/2008	Note	%
INDEX: 603_002_00_5	GHS07, GHS02	[1]	50 <= x % < 100
CAS: 64-17-5	Dgr		
EC: 200-578-6	Flam. Liq. 2, H225		
REACH: 01-2119457610-43-XXXX	Eye Irrit. 2, H319		
ETHANOL			

### Information on ingredients :

(Full text of H-phrases: see section 16)

[1] Substance for which maximum workplace exposure limits are available.

### **SECTION 4 : FIRST AID MEASURES**

As a general rule, in case of doubt or if symptoms persist, always call a doctor.

NEVER induce swallowing by an unconscious person.

### 4.1. Description of first aid measures

### In the event of exposure by inhalation :

Remove the victim away from the product. Provide fresh air. Consult a doctor in case the symptoms persist.

# In the event of splashes or contact with eyes :

Wash thoroughly with fresh, clean water for 15 minutes holding the eyelids open.

If there is any redness, pain or visual impairment, consult an ophthalmologist.

### In the event of swallowing :

In the event of swallowing, if the quantity is small (no more than one mouthful), rinse the mouth with water and consult a doctor.

Keep the person exposed at rest. Do not force vomiting.

Seek medical attention, showing the label.

If swallowed accidentally, call a doctor to ascertain whether observation and hospital care will be necessary. Show the label.

# 4.2. Most important symptoms and effects, both acute and delayed

No data available.

# 4.3. Indication of any immediate medical attention and special treatment needed

No data available.

### **SECTION 5 : FIREFIGHTING MEASURES**

### Flammable.

Chemical powders, carbon dioxide and other extinguishing gas are suitable for small fires.

### 5.1. Extinguishing media

Keep packages near the fire cool, to prevent pressurised containers from bursting.

## Suitable methods of extinction

In the event of a fire, use :

- sprayed water or water mist
- water with AFFF (Aqueous Film Forming Foam) additive
- halon
- foam
- multipurpose ABC powder
- BC powder
- carbon dioxide (CO2)

### - powder

#### - dry sand

Prevent the effluent of fire-fighting measures from entering drains or waterways.

### Unsuitable methods of extinction

In the event of a fire, do not use :

- water jet

### 5.2. Special hazards arising from the substance or mixture

A fire will often produce a thick black smoke. Exposure to decomposition products may be hazardous to health.

Do not breathe in smoke.

In the event of a fire, the following may be formed :

- carbon monoxide (CO)

- carbon dioxide (CO2)

Vapours may form explosive mixtures with air.

#### 5.3. Advice for firefighters

Due to the toxicity of the gas emitted on thermal decomposition of the products, fire-fighting personnel are to be equipped with autonomous insulating breathing apparatus.

### SECTION 6 : ACCIDENTAL RELEASE MEASURES

### 6.1. Personal precautions, protective equipment and emergency procedures

Consult the safety measures listed under headings 7 and 8.

### For non first aid worker

Because of the organic solvents contained in the mixture, eliminate sources of ignition and ventilate the area.

Avoid any contact with the skin and eyes.

Avoid contact with eyes.

#### For first aid worker

First aid workers will be equipped with suitable personal protective equipment (See section 8).

Staff personnel will wear a regularly cleaned work uniform

After contact with the product, all soiled parts of the body should be washed.

Protective equipment: nitrile rubber gloves, butyl (Thickness: 0.5 mm, Permeation: 3 (> 60 minutes)). Solvent resistant apron and boots.

Suitable type of protective boots :

In the event of weak splashes, wear protective boots or half-boots against the chemical risk conforming to standard NF EN13832-2 with a hydrocarbon resistant sole conforming to standard NF EN20346 / A1.

High concentration of gases / vapors: gas mask, filter type A.

Before any handling, it is necessary to wear side protection glasses in accordance with standard NF EN166. In the event of increased danger or in the event of spraying, use a face shield for the protection of the face in accordance with standard NF EN166.

#### **6.2.** Environmental precautions

Contain and control the leaks or spills with non-combustible absorbent materials such as sand, earth, vermiculite, diatomaceous earth in drums for waste disposal.

Prevent any material from entering drains or waterways.

#### 6.3. Methods and material for containment and cleaning up

Clean preferably with a detergent, do not use solvents.

### 6.4. Reference to other sections

No data available.

## SECTION 7 : HANDLING AND STORAGE

Requirements relating to storage premises apply to all facilities where the mixture is handled.

#### 7.1. Precautions for safe handling

Always wash hands after handling.

Remove and wash contaminated clothing before re-using.

Ensure that there is adequate ventilation, especially in confined areas.

#### **Fire prevention :**

Handle in well-ventilated areas.

Vapours are heavier than air. They can spread along the ground and form mixtures that are explosive with air.

Prevent the formation of flammable or explosive concentrations in air and avoid vapor concentrations higher than the occupational exposure limits.

Prevent the accumulation of electrostatic charges with connections to earth.

The mixture can become electrostatically charged: always ground when decanting. Wear antistatic shoes and clothing and make floors of non-conductive

Use the mixture in premises free of naked flames or other sources of ignition and ensure that electrical equipment is suitably protected.

Keep packages tightly closed and away from sources of heat, sparks and naked flames.

Do not use tools which may produce sparks. Do not smoke.

Prevent access by unauthorised personnel.

### **Recommended equipment and procedures :**

For personal protection, see section 8.

Observe precautions stated on label and also industrial safety regulations.

Avoid eye contact with this mixture.

Packages which have been opened must be reclosed carefully and stored in an upright position.

When personnel have to operate in the cabin, whether spraying or not, the ventilation may be insufficient to control solvent particles and vapors in all cases.

It is therefore advisable that personnel wear masks with compressed air supply during spraying operations, until the concentration of particles and solvent vapors has fallen below the exposure limits (face mask). gas, filter type A).

#### Prohibited equipment and procedures :

No smoking, eating or drinking in areas where the mixture is used.

### 7.2. Conditions for safe storage, including any incompatibilities

Keep out of the reach of children

Keep the bowl closed well in a freshly well ventilated place.

Keep away from heat

### Storage

Keep the container tightly closed in a dry, well-ventilated place.

Keep away from all sources of ignition - do not smoke.

Keep well away from all sources of ignition, heat and direct sunlight.

Avoid accumulation of electrostatic charges.

The floor must be impermeable and form a collecting basin so that, in the event of an accidental spillage, the liquid cannot spread beyond this area.

Recommended storage temperature: 20°C

### Packaging

Always keep in packaging made of an identical material to the original.

Recommended types of packaging :

- Vats
- Bottles

- Flexible plastics

- Suitable packaging materials :
- Plastic
- Glass

Unsuitable packaging materials :

- Wood
- Metal
- Cardboard
- Paper bag
- Textile

### 7.3. Specific end use(s)

The mixture is a biocidal product. It must not be used for applications other than those described in this safety data sheet and in the technical documents concerning the product.

Do not mix with other biocidal products.

Product intended for strictly professional use.

# SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1. Control parameters

# Occupational exposure limits :

- ACGIH TLV (American Conference of Governmental Industrial Hygienists, Threshold Limit Values, 2010) :

CAS	TWA :	STEL :	Ceiling :	Definition :	Criteria :

# 8.2. Exposure controls

# Personal protection measures, such as personal protective equipment

Pictogram(s) indicating the obligation of wearing personal protective equipment (PPE) :

Use personal protective equipment that is clean and has been properly maintained.

Store personal protective equipment in a clean place, away from the work area.

Never eat, drink or smoke during use. Remove and wash contaminated clothing before re-using. Ensure that there is adequate ventilation, especially in confined areas.

### - Eye / face protection

Avoid contact with eyes.

Use eye protectors designed to protect against liquid splashes

Before handling, wear safety goggles with protective sides accordance with standard EN166.

In the event of high danger, protect the face with a face shield.

Prescription glasses are not considered as protection.

Individuals wearing contact lenses should wear prescription glasses during work where they may be exposed to irritant vapours.

Provide eyewash stations in facilities where the product is handled constantly.

### - Hand protection

For all handling related to the packaging of the product, the wearing of waterproof gloves resistant to chemical agents, conforming to standard NF EN374 is recommended, for example: nitrile rubber gloves, neoprene rubber, butyl rubber (Thickness: 0.5 mm, Permeation: 3 (> 60 minutes)).

The exact choice of the type of gloves depends on the type of work performed. Gloves should be selected in consultation with a glove manufacturer and after a thorough evaluation of working conditions. Gloves should be replaced regularly.

### - Body protection

Suitable type of protective clothing :

Wear antistatic clothing made from heat resistant natural or synthetic fibres in accordance with standard EN1149.

Work clothing worn by personnel shall be laundered regularly.

After contact with the product, all parts of the body that have been soiled must be washed.

### - Respiratory protection

Under normal conditions of use, protection is not required.

For all manipulations related to the packaging of the product, and in the event of insufficient ventilation, or in the event of the exposure limits being exceeded: Wear respiratory protection equipment. Recommended: Combined filter AX or ABEK.

# SECTION 9 : PHYSICAL AND CHEMICAL PROPERTIES

# 9.1. Information on basic physical and chemical properties

General information :				
Fluid liquid.				
Crystal clear colorless.				
Alcohol				

### Important health, safety and environmental information

pH :	6.50 +/- 1.5.		
	Neutral.		
Boiling point/boiling range :	> 35°C		
Flash Point :	21.00 °C.		
Vapour pressure (50°C) :	Not relevant.		
Density :	= 0.850 g/cm3 +/- 0.020		
Water solubility :	Soluble.		
Melting point/melting range :	Not relevant.		
Self-ignition temperature :	Not relevant.		
Decomposition point/decomposition range :	Not relevant.		
9.2. Other information			

#### 9.2. Other miormatic

No data available.

# SECTION 10 : STABILITY AND REACTIVITY

## 10.1. Reactivity

No data available.

### 10.2. Chemical stability

This mixture is stable under the recommended handling and storage conditions in section 7.

### 10.3. Possibility of hazardous reactions

When exposed to high temperatures, the mixture can release hazardous decomposition products, such as carbon monoxide and dioxide, fumes and nitrogen oxide.

### 10.4. Conditions to avoid

Any apparatus likely to produce a flame or to have a metallic surface at high temperature (burners, electric arcs, furnaces etc.) must not be allowed on the premises.

Avoid :

- accumulation of electrostatic charges.
- heating
- heat
- flames and hot surfaces
- frost
- shock and friction

#### 10.5. Incompatible materials

- Keep away from :
- strong acids
- strong bases
- flammable material
- combustible material
- oxidising material

#### **10.6.** Hazardous decomposition products

The thermal decomposition may release/form :

- carbon monoxide (CO)
- carbon dioxide (CO2)

# SECTION 11 : TOXICOLOGICAL INFORMATION

# 11.1. Information on toxicological effects

May have reversible effects on the eyes, such as eye irritation which is totally reversible by the end of observation at 21 days. Splashes in the eyes may cause irritation and reversible damage

### 11.1.1. Substances

Acute toxicity :

ETHANOL (CAS: 64-17-5) Oral route :

LD50 = 10470 mg/kg Species : Rat OECD Guideline 401 (Acute Oral Toxicity)

Dermal route :	LD50 > 20000 mg/kg Species : Rabbit
Inhalation route (Vapours) :	LC50 = 117-125 mg/l Species : Rat OECD Guideline 403 (Acute Inhalation Toxicity) Duration of exposure : 4 h
11.1.2. Mixture	
Serious damage to eyes/eye irritation :	
Causes severe eye irritation (H319).	
Monograph(s) from the IARC (International Agenc	
CAS 67-63-0 : IARC Group 3 : The agent is not clas	
CAS 64-17-5 : IARC Group 1 : The agent is carcino	genic to humans.
SECTION 12 : ECOLOGICAL INFORMATION	
12.1. Toxicity	
12.1.1. Substances	
ETHANOL (CAS: 64-17-5) Fish toxicity :	LC50 = 11200  mg/l
Tish toxicity.	Duration of exposure : 96 h
	NOEC = 250  mg/l
	OECD Guideline 212 (Fish, Short-term Toxicity Test on Embryo and Sac-Fry Stages)
Crustacean toxicity :	EC50 > 857 mg/l Duration of exposure : 48 h
	NOEC > 9.6 mg/l
Algae toxicity :	ECr50 > 275 mg/l Duration of exposure : 72 h
12.1.2. Mixtures	
No aquatic toxicity data available for the mixture.	
12.2. Persistence and degradability	
12.2.1. Substances	
ETHANOL (CAS: 64-17-5)	
Chemical oxygen demand :	DCO = 1.99  g/g
Biodegradability :	Rapidly degradable.
12.3. Bioaccumulative potential	
12.3.1. Substances	
ETHANOL (CAS: 64-17-5)	
Octanol/water partition coefficient :	$\log \text{Koe} = -0.3$
12.4. Mobility in soil	
No data available.	
12.5. Results of PBT and vPvB assessment	
No data available.	
12.6. Other adverse effects	
No data available.	

#### **SECTION 13 : DISPOSAL CONSIDERATIONS**

Proper waste management of the mixture and/or its container must be determined in accordance with Directive 2008/98/EC.

#### 13.1. Waste treatment methods

Do not pour into drains or waterways.

### Waste :

Waste management is carried out without endangering human health, without harming the environment and, in particular without risk to water, air, soil, plants or animals.

Recycle or dispose of waste in compliance with current legislation, preferably via a certified collector or company.

Do not contaminate the ground or water with waste, do not dispose of waste into the environment.

### Soiled packaging :

Empty container completely. Keep label(s) on container.

Give to a certified disposal contractor.

# SECTION 14 : TRANSPORT INFORMATION

Transport product in compliance with provisions of the ADR for road, RID for rail, IMDG for sea and ICAO/IATA for air transport (ADR 2019 - IMDG 2018 - ICAO/IATA 2020).

### 14.1. UN number

1993

### 14.2. UN proper shipping name

UN1993=FLAMMABLE LIQUID, N.O.S.

(ethanol)

### 14.3. Transport hazard class(es)

### 14.4. Packing group

IJ

14.5. Environmental hazards

### 14.6. Special precautions for user

For excepted quantities, see part 2.6 of the OACI/IATA and chapter 3.5 of the ADR and IMDG.

# 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

No data available.

# SECTION 15 : REGULATORY INFORMATION

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

### - Classification and labelling information included in section 2:

The following regulations have been used:

- EU Regulation No. 1272/2008 amended by EU Regulation No. 2018/1480 (ATP 13)

- EU Regulation No. 1272/2008 amended by EU Regulation No. 2019/521 (ATP 12)

### - Container information:

No data available.

- Particular provisions :

No data available.

- Labelling for biocidal products (Regulation 1896/2000, 1687/2002, 2032/2003, 1048/2005, 1849/2006, 1451/2007 and Directive 98/8/EC)

٠				
	Name	CAS	%	Product-type
	ETHANOL	64-17-5	751 g/kg	01
				02
				04

Product-type 1 : Human hygiene.

Product-type 2 : Disinfectants and algaecides not intended for direct application to humans or animals.

Product-type 4 : Food and feed area.

15.2. Chemical safety assessment

No data available.

# **SECTION 16 : OTHER INFORMATION**

Since the user's working conditions are not known by us, the information supplied on this safety data sheet is based on our current level of knowledge and on national and community regulations.

The mixture must not be used for other uses than those specified in section 1 without having first obtained written handling instructions.

It is at all times the responsibility of the user to take all necessary measures to comply with legal requirements and local regulations.

The information in this safety data sheet must be regarded as a description of the safety requirements relating to the mixture and not as a guarantee of the properties thereof.

#### Wording of the phrases mentioned in section 3 :

H225	Highly flammable liquid and vapour.
H319	Causes serious eye irritation.

### Abbreviations :

DNEL : Derived No-Effect Level

PNEC : Predicted No-Effect Concentration

STEL : Short-term exposure limit

TWA : Time Weighted Averages

TMP : French Occupational Illness table

TLV : Threshold Limit Value (exposure)

AEV : Average Exposure Value.

ADR : European agreement concerning the international carriage of dangerous goods by Road.

IMDG : International Maritime Dangerous Goods.

IATA : International Air Transport Association.

ICAO : International Civil Aviation Organisation

RID : Regulations concerning the International carriage of Dangerous goods by rail.

WGK : Wassergefahrdungsklasse (Water Hazard Class).

GHS02 : Flame

GHS07 : Exclamation mark

PBT: Persistent, bioaccumulable and toxic.

vPvB : Very persistent, very bioaccumulable.

SVHC : Substances of very high concern.
